

APPLICATION CHECKLIST: Pool Application

STONEHILL VILLAGE DESIGN REVIEW BOARD

The following checklist can assist in the preparation of your application to install a pool. This checklist doesn't replace or supersede the Governing Documents for Stonehill Village.

- Review the standards in the Community Design Review Standards, the Rules & Regulations for the Community DRS, and the Neighborhood Design Review Standards for *your* Neighborhood
 - **Part 2.04** of the Rules & Regulations for the Community DRS details the required application contents (see also **Article Four** of the Community DRS)
 - **Part 3.04(E)** of the Rules & Regulations for the Community DRS details the general standards for pools in all of Stonehill Village (see also **Article Five** of the Community DRS)
 - Note that pools must be screened with appropriate landscaping (see **Part 3.02** of the Rules & Regulations for the Community DRS for the general standards for Landscape Features in all of Stonehill Village) and must include a fence (see **Part 3.04(A)** of the Rules & Regulations for the Community DRS for the general standards for Landscape Features in all of Stonehill Village)
 - **Article Six** of the Community DRS details the construction requirements
- Complete the Post-Construction Improvement Application (*attached to the Rules & Regulations for the Community DRS as Schedule 2*)
 - The Owner must sign the Application (not the contractor)
- Obtain any permits that may be required for your project (from the Township, County, etc.). Copies of the permits must be provided to the DRB *before* you begin any work on your project, but you can wait to obtain the permits after the DRB has issued conditional approval of your application
 - Don't forget to have all underground utilities marked before you dig
- Prepare a Site Plan (*see **Part 2.04(E)(1)** of the Rules & Regulations for the Community DRS for specifications*)
 - Hand-drawn Site Plans for patios are not permitted; must be professionally generated
- Prepare a Landscape Plan (*see **Part 2.04(D)(1)** of the Rules & Regulations for the Community DRS for specifications*)
 - Hand-drawn Landscape Plans are acceptable
- Prepare Cut Sheets for each type of plant you wish to install as part of your project (*blank form attached to Post-Construction Improvement Application*)
 - If you need help finding the information for the Cut Sheets, try looking up the plants on websites such as the following:
<http://www.missouribotanicalgarden.org/plantfinder/plantfindersearch.aspx>
<https://www.siebenthaler.com/plantfinder/>
- Gather *clear* photos and samples of the existing Primary Structure, Landscaping and Accessory Structures located on your Lot, and photos and/or samples of all non-plant materials you intend to use
 - Capture all relevant angles so the DRB can clearly see how your proposed Improvement will impact the existing condition of your Lot, neighboring Lots and Common Areas
- Pay the fee for the application (*see **Schedule 3** of the Rules & Regulations for the Community DRS*)
- Submit your application to the DRB using one of the methods listed on page 2 of the Post-Construction Improvement Application
- When you have received notice that your application has been approved or conditionally approved, you may begin the work – and be sure to complete it within 6 months of the approval

- When the work is complete, notify the DRB using the same method by which you submitted your application. They will then review it and issue a Certificate of Completion, so that Association records reflect the fact that your Improvement complies with the Governing Documents.
